

To whom this may concern:

I'm writing in hopes that the FCC will not bar XM Satellite Radio from airing Instant Traffic & Weather reports to it's subscribers. I benefit from listening to XM Satellite Radio in many ways and the thought that it may be censored from airing information that serves it's subscribers just galls me. The state of terrestrial radio has suffered (in my opinion) since deregulation and I'm willing to PAY for programming that I can no longer find on stations that are all sounding the same! Satellite radio provides variety and quality that are not available elsewhere. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve. Thanks very much for your consideration...Johanna Petersen
